Why WebEOC?

Used by thousands of government agencies, hospitals, and private-sector entities, WebEOC is the gold standard in critical incident management. By offering students exposure to the same tools used in real disasters and events, the WebEOC Educational Subscription equips learners with an edge in employability and operational readiness.

Who Is It For?

This program is designed for colleges and universities offering degrees in Emergency Management, Homeland Security, Public Administration, and related disciplines. It also supports community colleges and vocational schools that want to provide career-aligned coursework, as well as research institutions advancing studies in disaster preparedness and crisis response.

Career and Technical Education (CTE) programs can use it to introduce students to the fundamentals of emergency management, while faculty and curriculum developers will find it valuable for incorporating applied technology and scenario-based learning into their courses.

Learning Outcomes

Students will gain practical skills in navigating and using WebEOC for incident management and operational coordination.

By the end of the program, students will be able to:

- ▶ Navigate and operate WebEOC for real-time incident management
- ▶ Log incidents, update boards, and track resources in simulated EOC environments
- ▶ Interpret activity logs and dashboards to derive operational insights
- ▶ Participate in instructor-led scenarios that reinforce WebEOC workflows
- ▶ Demonstrate WebEOC proficiency for entry-level roles in emergency operations centers
